PROFILE

MCA student at NIT Raipur with strong skills in Java, Spring Boot, React, REST APIs, MySQL, JWT Authentication, and full-stack development. Experienced in building secure backend APIs, responsive user interfaces, AI-enabled dashboards, and deployment-ready web applications.

EDUCATION

- **National Institute of Technology, Raipur** Aug 2024 – Present
Master of Computer Applications (MCA) CPI: 7.72/10
- **Dr. Shyama Prasad Mukherjee University, Ranchi** 2020 – 2023
Bachelor of Science in Mathematics CGPA: 9.29/10

TECHNICAL SKILLS

- **Languages:** Java, C, C++, Python, JavaScript, SQL, HTML, CSS, PHP
- **Backend:** Spring Boot, Spring Security, REST APIs, JWT Authentication, JPA/Hibernate, Maven, FastAPI
- **Frontend:** React, Vite, React Router, Axios, Material UI, Bootstrap, Recharts, Responsive UI
- **AI/Analytics:** Ollama, Gemini API, OpenAI API, Financial Analytics, Forecasting, Anomaly Detection
- **Database & Tools:** MySQL, H2 Database, Git, GitHub, GitHub Actions, npm, IntelliJ IDEA, Postman
- **Core CS:** Data Structures and Algorithms, DBMS, OOP, Operating Systems, Computer Networks, Software Engineering

PROJECTS

- **SkyLink — Full-Stack Airline Booking Platform** Live Demo | GitHub
React 19, Vite, Spring Boot 3.5, Java 21, MySQL, JWT, JPA/Hibernate, GitHub Actions
 - Built a full-stack airline booking platform with flight search, fare comparison, seat selection, booking creation, booking history, cancellation, offers, trip planner, and flight-status tracking.
 - Developed secure Spring Boot REST APIs with layered architecture, JWT authentication, BCrypt password hashing, OTP workflow, JPA/Hibernate, and MySQL persistence.
 - Implemented airport autocomplete and flight search using city, airport name, IATA/ICAO codes, country, and keywords with a browser-based demo dataset of 9000+ airport records.
 - Deployed the React frontend on GitHub Pages using GitHub Actions and added demo support for login, OTP, flight search, seat selection, booking, and cancellation preview.
- **AI-Powered FinTech Expense & Loan Dashboard** Live Demo | GitHub
React, Spring Boot, Java, Spring Security, JWT, H2/MySQL, Ollama, Gemini/OpenAI API, Recharts
 - Built a FinTech dashboard with expense tracking, loan verification, payment recording, budget monitoring, transaction history, CSV export, and responsive analytics UI.
 - Implemented real financial analytics including category-wise spending, monthly trends, budget usage, anomaly detection, moving-average expense forecasting, and saving recommendations.
 - Integrated a backend-secured AI assistant with multi-provider LLM support using Ollama for local AI, Gemini/OpenAI for cloud demos, and analytics fallback when the LLM is unavailable.
 - Designed the chatbot to answer free-form finance questions using actual dashboard context such as recent transactions, top categories, monthly expenses, budget status, loan/EMI data, and unusual spending patterns.
 - Kept LLM provider keys and model configuration on the backend to prevent API key exposure in the React frontend, while supporting GitHub Pages demo data and OTP-enabled authentication flow.
- **Student Form & Notification Portal** Live Demo | GitHub
HTML, CSS, JavaScript, PHP, MySQL
 - Developed a responsive student portal with registration, login, form submission, notification management, MySQL-backed student records, and an admin dashboard for managing submitted data.

CAREER OBJECTIVE

- Seeking entry-level Software Development / Full Stack Development opportunities to apply Java, Spring Boot, React, REST APIs, MySQL, authentication, and AI integration skills in real-world software projects.
